

# Passive/logging GPS Tracker

## Tracking Key

The Tracking Key is a small, pocket sized device that receives signals from the satellites orbiting the earth. The internal computer accurately determines the location of the device within 2.5 meters and records this data every second.

With this data and the included Tracking software, you can accurately determine where a person travelled, how fast they drove, where they stopped and for how long. The recorded data from the Tracking Key can be displayed over a street map, satellite images or in a text report..

### SPECIFICATION:

Dimensions: 96.5x42x38mm

Battery Life

1 Hour per Day Driving 3.5 Weeks

2 Hours per Day Driving 1.5 Weeks

4 Hours per Day Driving 7 days

Horizontal Accuracy 2.5 meters

### FUNCTIONALITY:

- Logs data, every second
- Very affordable and NO monthly fees!!!
- Runs on just 2 x AAA batteries
- Can be placed in, on, or under the vehicle in seconds.
- Create an easy to read text report
- Average battery life of 2 weeks with standard Alkaline batteries, 3 weeks with Lithium batteries.
- Battery life depends on hours driven per day. Above calculations are determined with 2 hours of driving per day.
- Fast USB download. The tracking key plugs right into your computer.
- Low battery indicator lets you know if you need new batteries.
- Data is compatible with the Google Earth.
- Shows every stop the driver makes.
- Shows you the maximum speed driven for the day.
- Displays location, date, and time of every stop.
