

Passive/logging GPS Tracker

Tracking Key 3100

GPS Tracking System 3100-INT is a small and compact passive GPS tracking device. It comes with an internal GPS antenna. It comes with an internal GPS antenna and logs the GPS co-ordinates, while in motion, every second within 2.5 meters accuracy. The data can be downloaded to the PC via a USB Port.

With the GPS software, the data can be displayed on a digital map through Google Earth or text report.

The data recorded can accurately display where a person travelled, how fast they drove, where they stopped and for how long.

It is powered by just 4 AA batteries or hard-wired to the vehicle and can be quickly installed anywhere on the vehicle with its strong magnets.

SPECIFICATION:

Dimensions: 106.5x86.3x43.1mm
Battery Life

1 Hour per Day Driving 5 Weeks
2 Hours per Day Driving 2.5 Weeks
4 Hours per Day Driving 1 Week

Horizontal Accuracy 2.5 meters

FUNCTIONALITY:

- Hand held size makes it very easy to hide
- No installation required
- No monthly fees
- Internal Antenna
- Strong magnet mounts
- External 12 Volt power input option
- Includes powerful software with satellite imagery.
- 12 Channel GPS receiver
- Built-In Motion Detector
